

A DOCUMENT INSPECTION METHOD FOR AUTO FEEDING DEVICE

Abstract

5 The invention is a method to inspect multiple conditions of an auto
feeding device feeding standard inspection papers into a scanning device
while the said auto feeding device in QC process. The method is to use a bar
code printed on the standard inspection paper to recognize the conditions
that feeding multiple papers in one time, paper jam, paper inclined, etc. The
10 bar code is continuous and unique, and therefore, the results for which
standard inspection paper happened problem and how many more papers
needing to be inspected are known immediately.
